

# Meyer®

## Year-Round Performance For Utility Vehicles.

Add a Meyer® Drive Pro™ plow to your utility vehicle and you have the perfect solution for plowing sidewalks, long driveways or any area where a pick-up truck is too large. Our contractor-grade plow features Meyer's easy-to-use 2", Class 3 receiver mount and is available in three moldboard sizes (5', 6' and 6' 8") to suite your application. Available with full hydraulics or self-angling.

Meyer's EZ-Mount receiver hitch allows you to remove or mount the Drive Pro plow in seconds.

# Fits the Biggest Names in the Business.

The Drive Pro with the EZ-Mount® receiver hitch will fit on some of the biggest utility names in the business including: John Deere, Bobcat, Kubota, Polaris and more.

## EZ-Mount® Receiver Hitch

comes on/off the vehicle in seconds by removing one pin.

Step 1: Insert or remove the pin

Step 2: Position the wheels

Step 3: Connect/disconnect power plug

Step 4: Roll the plow away

## One-Button Control

All Drive Pros come standard with an ergonomically-designed pistol grip controller that features intuitive buttons to easily control the functions of the plow.

Available in two options:

- Full power-angling controller allows the plow to go up/down, left/right like a traditional plow.

- Self-angling controller allows the blade to go up/down by pressing a button. Right/left movement is controlled by the weight distribution of the snow on the plow.

The optional **Self-Angling System** senses the weight of the snow and automatically angles to push snow off to the side. Or, if you prefer, you can lock the plow in the direction you want.

### Meyer Utility Plow Specifications

Model #	Blade Type	Moldboard Length	Moldboard Height	Moldboard Gauge	Vertical Ribs	Plow Trip Springs	Cutting Edge	Average Width at Full Angle	Angling Rams	Weight Complete
